ROSEDALE

Fall 1922

To Our Customers.

We take this opportunity to thank our customers for continued confidence. Our sales the past two years have far exceeded those of any previous two years that we have been trying to solve your horticultural problems. Owing to ideal growing weather, we are able to offer this fall the best and most complete list. Every department is full of good varieties.

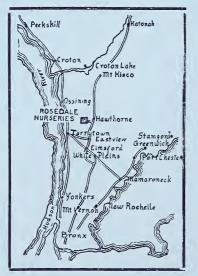

Write plainly the explicit directions as to address and mode of shipment. Without instructions we will use our best judgment and forward by the shortest and safest route. We recommend express for all small shipments and herbaceous plants.

PRICES in this catalog cancel all previous lists and are subject to change without notice. Our prices are f. o. b. our shipping station or at the nursery. By combining several small orders for a nearby locality, motor truck delivery could be made at a nominal charge. Arrangement can be made for long distance deliveries by truck of full truck loads.

PACKING. All goods are thoroughly packed, insuring safe delivery. All packing charges are included in our list prices, except for specimen stock of unusual size, of which packing will be at cost.

TERMS. Cash with the order, except to parties who satisfy us with their financial responsibility when accounts are due in thirty days.

GUARANTEE AND CLAIMS. All goods are guaranteed true to name, full count, and in good condition when shipped. Any plant proving untrue to name will be replaced. Our stock, having been frequently transplanted, thrifty, and well packed, insures its success if properly cared for after planting. There are so many conditions beyond our control after it leaves our hands that we can give no guarantee on the life of the stock; however, any just complaint will receive our utmost consideration if claims are made within five days after receipt of goods. All goods are at purchaser's risk after delivered to forwarding companies and we receive their receipt for shipment in good condition. Claims for damages when in transit must be made to delivering company; have the delivering agent note the damaged condition on the freight bill, promptly present your claim to the transportation company and send us copies of all papers so we can help you secure prompt settlement.

In the Heart of Westchester Co.

TO PLANT A TREE OR SHRUB IS A VERY EASY MATTER IF ONE WILL CAREFULLY FOLLOW THESE 4 RULES:

FIRST.—Dig the holes large enough to admit the roots to spread out in their natural position, and deep enough to allow the plant to stand at the same depth it stood in the nursery. More trees are lost by deep planting than by shallow.

SECOND.—Use no fertilizer, but sprinkle fine soil among the roots, shaking the tree a little if necessary, or using the hand, if the fibrous roots are very numerous, so that every root may come in contact with the soil.

THIRD.—When the roots are well covered, the earth should be tramped, or tamped, as firm as a post. Put in more earth and tamp again. The last two or three inches of earth should not be tamped, leaving it loose for the rain to be taken in. Do not round up the earth about the tree, lest the water run off. If the weather is dry early in fall or late in the spring, water may be poured in about the tree; otherwise it is seldom necessary.

FOURTH.—Give the tree a good mulching to hold the moisture, or stir the ground with a hoe once a week.

DELIVERY.—It may be noted by the map that our nursery is in the heart of Westchester County, which insures quick delivery by truck to all points within the county and nearby points in Connecticut, so that you may plant your choice material within a few hours after it has left the nursery soil.

PEONIES FOR FALL PLANTING

O flowers exceed the Peonies in popularity, and none are more easily grown. They are seldom attacked by insects or disease, and are perfectly hardy, requiring no covering in the severest weather. They thrive in all kinds of soil and flourish in a rich, deep loam. They demand much moisture a bloom'ng time, and if grown in partial shade the blooms will, therefore last longer and be equally fine in other respects.

No hardy perennial is of more permanent value than the Peony. The first cost is the only cost, and they continue to increase in size and value for many years. The foliage is rich and of beautiful deep green color, which renders the plant very ornamental even when out of flower, and few other flowers are so well adapted for interior decoration and none make more massive color effect when planted in a border or in a bed on the lawn. Their popularity has increased during the past few years since the new improved varieties have been disseminated. Peonies range in color from cream combinations of tint and form.

combinations of tint and form.

Suitable Places for Peonies

Since peonies are very decorative in all situations, not only because of the splendor of their blooms but also from their attractive foliage, they are not out of place in almost any location. Care should be taken, however, not to plant them too near the spreading roots of trees and shrubs which would rob them of nourishment and moisture, but partial shade from trees at a distance is beneficial. Peonies make a very attractive border along a path or driveway, especially if planted alternately with phlox so that the season of bloom may be continued most of the summer. They are also very effective in large beds, either alone or interspersed with phlox. If desired for abundance of cut flowers only, they may be planted in the vegetable garden.

Suggestions for Peony Collections

Most helpful suggestions as to making a collection of peonies may be found in an able article. "Everyman's Peonies," by Prof. A. P. Saunders, Secretary of the American Peony Society, in the September, 1916, "Garden Magazine", a portion of which we quote herewith. He says:

"It is a mistake to suppose that all the best Peonies are of recent origin, and therefore high in price. Many sorts that have been on the market for half a century, sorts that have been on the market for half a century, and are now quite cheap, are still so good that they should be in every collection, and some are still stubbornly contesting with the newcomers their right to be considered the finest in their class. There is, then no difficulty in choosing from among the low priced sorts a group of half a dozen whose quality is extra.

Duchess de Nemours (Calot). White.

Festiva maxima. White.

Jeanne d'Arc. Cream and pink.

Mlle. Leonie Calot. Pink and yellow.

Marie Lemoine. White (late).

Of the above varities there is not one but will unfold new wonders of delight if some of its blooms are brought indoors.

If we may continue this list to include a second half dozen, selling a little higher in price I should name as of unexceptionable quality, these:

Madame Emile Galle. Flesh Pink.

Eugene Verdier. Flesh pink and yellow.

Carnea elegans (Calot.) Pink and cream.

Madame de Galhau. Pink. Madame de Vatry. Pale pink and cream.

Richardson's Grandiflora. Pale rose pink (late).

And if more were desired at this level of price, it would be safe to add: Eugen'e Verdier, Glorie de Charles Gombault La Rosiere, Monsieur Dupont, Triomphe de l'Exposition de Lille.

This gives such a collection as any one might be happy to own. But there are some buyers who are not happy in following suggestions made under a price limit, and for such, I give now a list of

BEST PEONIES REGARDLESS OF COST

In a list of the fifty best peonies, I should include all or almost all of those named above, in addition to other more costly kinds.

Regardless of anything, then, except the sheer beauty of the flower, my choice of the very cream of what we now have would include these sorts: Therese, two varities almost if not quite identical, Marie Crousse, Grand flora, James Kelway, Venus, Duchess de Nemours (Calot), Jeanne d'Arc, Philomele, Marie Lemoine, Eugene Verdier, Mme. Boulanger, Baroness Schroeder, Mile. Leonie Calot, Milton Hill, Carnea Elegans (Calot).

Prof. Saunders confesses he is not fond of deeper pinks and reds but for those who desire these colors names the following: Mon. Jules Elie, Livingston, Kelways Queen, Albert Crousse, Claire Dubois, Felix Crousse, Edouard Andre, Mon. Martin Cahuzac, Adolph Rousseau, Volcan.

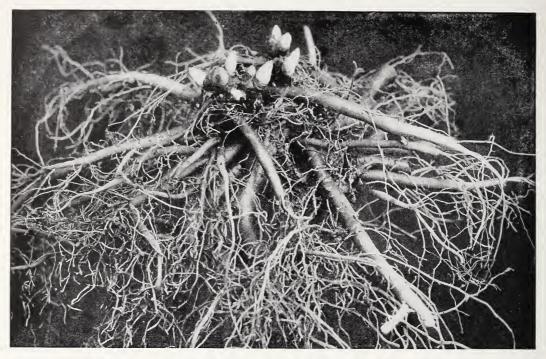

He further says: "Some single Peonies, like great Wild Roses with hearts of gold, should certainly be included in your collection."

For three or four years we have been publishing the above suggestions of Prof. Saunders, believing them very helpful to those who do not know peonies. But there is a wide range in price in those he names.

We would divide the whole list of peonies into four classes: First, new and scarce varieties which sell from four dollars up; Second, those that sell from \$1.50 to \$4.00; Third, those that sell at prices from 75c up to \$1.50; and Fourth, all those that sell below 75c. Purchasers from class one are likely to be peony fans or those who do not need advice about the selection. Purchasers of plants in class four are looking for some of the good old varieties of peonies for landscape purposes at a minimum price and would select largely according to color. Purchasers of plants from classes two and three may find assistance in the following lines.

For those who wish a choice selection of peonies at a moderate price, say not to exceed \$1.50 each, a purchaser would never be disappointed in any of the following, viz: Albert Crousse, Augustin d'Hour, Avalanche, Carnea Elegans, Claire Dubois, Couronne d'Or, Eugenie Verdier, Grandiflora, Lamartine, La Rosiere, La Tendresse, Livingstone, Mme. Emile Galle, Mle. Rousseau, Marguerite Gerard, Marie Jacquin, Marie Lemoine, Modeste Guerin, Philomele, Prince de Talindyke, Venus, Lemon Queen, and Whitleyi Major.

For those who have these varieties and are willing to pay a little more, the following named varieties are well worth the prices: Adolphe Rousseau, Asa Cray, Aurore, Baroness Schroeder, Eugene Verdier, Germaine Bigot, Mme. Auguste Dessert, Mme. Emile Lemoine, Mme. Lemonier, Marcelle Dessert, Marie Crousse, Milton Hill. Mons. Jules Elie, Reine Hortense, Clairette, La Fiancee, L'Etincelante, Mikako.

Peony Root

Culture of the Peony

HE Peony is of exceedingly easy culture, perfectly hardy and not very particular about the nature of the soil, but is particular about having fertility. good

SOIL. To perfect so many

SOIL. To perfect so many large blossoms as a good clump of Peonies will set, the soil should be well prepared so that plenty of nourishment as well as moisture may be had at blooming time. Although any good fertilizer, if well incorporated with the soil, will do, none is better than well rotted cow manure, which should be used in liberal quantities but placed far enough below the roots so that cow manure, which should be used in liberal quantities, but placed far enough below the roots so that the rootlets will not be affected by it until they have well started to grow. If the sub-soil is of a good loamy texture, the excavation of two feet with a layer of six inches of well rotted cow manure at the bottom, well spaded in, will be sufficient. If, however, the subsoil is of the nature of light sand or hardpan, it should be removed entirely and alternate layers of old sods and manure put in its place. Heavy clay should be lightened by the aid of sand, leaf mold and manure, mixing it thoroughly by overturning it several times.

PLANTING. The time to plant Peonies is September and October, although they may be safely planted whenever the ground is open until April 1st. Do not plant before September 5th lest the roots should not be well ripened; and do not leave the matter until be well ripened; and do not leave the matter until spring, for they are sure to make considerable growth before the ground is workable. Like other plants, the roots should be planted at the proper depth and the earth very tightly packed among and over them. Be sure to set the eyes three or four inches below the surface. Plants should be set at least three feet apart so that they will have ample room for development.

After the ground 's frozen to a depth of two or three inches it is well to cover the plants the first season

with a light dresing of manuure to keep them from heaving by the frost. They do not need to have protection from the cold and will not need it after the first winter as the roots will have fast hold of the ground and will endure the most severe climate. covered too deeply or planted too deeply they are apt to send up blind buds.

CULTIVATION. In early spring as soon as the ground has dried out sufficiently, the soil about the plant should be dug over to work in the manure and pulverize the soil. Shallow cultivation should be continued at intervals all summer to maintain the dust mulch.

A good way to utilize the ground the first season or two is to plant a row of Phlox between the rows of Peonies. Should there be an extreme drought in April or May, a thorough drenching of the beds once or twice a week would well repay in extra bloom. As Phloxes are fond of the same treatment these plants thrive well together, the latter giving a succession of bloom for two months after the Peonies are over.

It large, individual blooms are desired, the lateral buds should be removed early, thus throwing all the strength into the one central bud; and, if exhibition blooms are wanted, several of the stems may be pinched off when they emerge from the ground, leaving two or three of the stronger ones which will take the entire strength of the plant. An application of liquid manure to the roots once a week soon after the buds have formed, will also increase the size and color of the flower. If large, individual blooms are desired, the lateral

AS A CUT FLOWER the Peony is unexcelled. Cut when the first outer petals roll back and place in a cool room, always giving the flower stems a fresh cut every day, and also fresh water. The moment the buds are cut they should be dropped into a bucket of water. Developed in this way, most varities will last a week. To retard them several days place them in a room that is cool and dark. In this way they may be kept beyond their period of bloom and will open larger and of better color than those left on the plant.

A Month of Peonies According to Color

Let us help you select early, midseason and late varieties, so as to give a month of white, a month of yellow, a month of light pink, a month of deep pink, a month of red or a month of purple.

In the following list of Peonies according to color, we have indicated by the letters "E"—early; "M"—midseason; and "L"—late varieties. These are still further differentiated, very early, early midseason, late midseason, very late in the descriptions in the full alphabetical list.

The earliest to bloom are the Officinalis varieties, which begin blooming in this vicinity about May 20th, the season closing June 25th to July 4th with such varieties as Grandiflora, Madame de Galhau, Madame Emile Galle, Marie Lemoine, Purpurea Superba, and others.

For twenty years we have been interested in collecting and growing the best peonies. We have from time to time rejected varieties that did not come up to our high ideal, with the hope of reducing our list 100 varieties. But many new varieties have come out in recent years, some of which are superior to many of the older varieties. Thus we have been adding as well as rejecting, and our list now comprises a little less than 200 varieties.

The Best Size Roots to Buy

While our strong one year roots will all bloom for you the first year, the two year size is the best buy; for having become established the first year from division, the growth is more than double the second year and the prices are only about one-half more. Of a very few rare, high priced varieties, we offer 2-4 eye divisions, but in every case this is stated in the price list.

Some growers are offering divided roots at about the same prices as those of our one year plants. Our plants have had a year to heal the wound from dividing and grow a lot of fine roots to push the plants next year.

Rosedale roots need no coddling or nursing. Time for development under our careful culture in soil adapted to their growth has given them the "pep" for business.

A Basket of Scarce, New Varieties With such choice ones, no wonder we get orders from many other Peony specialists.

It in Doubt, Ask Us.

From the short descriptions in any peony list, the buyer is often at a loss to decide. We suggest, FIRST: Forget about prices; for many of the good ones are only \$1.00 or less; (e. g.) Festiva Maxima at 65c is unexcelled by any other white peony priced at less than \$5.00. SECOND: Note carefully the rating. If a variety with 20 or more votes is rated 8.0 or above, you cannot go wrong, no matter how low the price, and there are quite a number below 8.0 that should be in every collection. No peony lover could do without Edulis Superba 7.6, Gloire de Chas. Gombault 7.9, Mme. de Verneville 7.7, or Mme. Crousse and Mme. de Calhau 7.5. THIRD: Be sure to place your order with a reliable house, even though prices may be a little higher, and, where possible, order nothing less than one or two year plants, preferably the latter.

Explanation of the Numbers in the Alphabetical List

The figures which precede the names indicate the rating on a scale of 10, according to the Symposum of the American Peony Society in Bulletin No. 14, published in 1921. These figures were carefully compiled by the secretary from over 80 lists sent in by members of the society. Those in parenthesis directly under the rating denote the number of votes. Where there are no figures, the variety is too scarce to have sufficient votes.

It will be noted that we grow only 7 varieties rated at less than 7.0. Of 22 Peonies ranking 9.0 we grow all but 3. Of 69 Peonies ranking from 8.0 to 9.0 based on 20 or more votes, we grow 53. Of 22 Peonies ranking 9.0 to 10

DISCOUNT ON PEONIES

On orders of not less than three plants of a kind and amounting to \$10.00 to \$50.00, we will make a discount of 10 per cent; on orders of \$50.00 and up, 15 per cent. On varieties priced at \$3 and up prices net.

No charge for boxing and packing.

Discounts do not apply to special offer.
It will be to your interest to order at once to secure the plants you wish. Some of the varieties will be sold out before planting time.

Many of those who visited our fields in June were

so enthusiastic that they placed large orders with us.

SPECIAL OFFER

To those wishing plants for mass planting, or cut-flowers, and not particular about names we offer a bargain: Strong 1-year clumps, \$4.50 per dozen, \$30.00 per 100. Strong 2-year clumps \$7.00 per dozen, \$50.00 per 100; fifty at hundred SPECIAL OFFER

2-4 eve

Description and Price List of Peonies

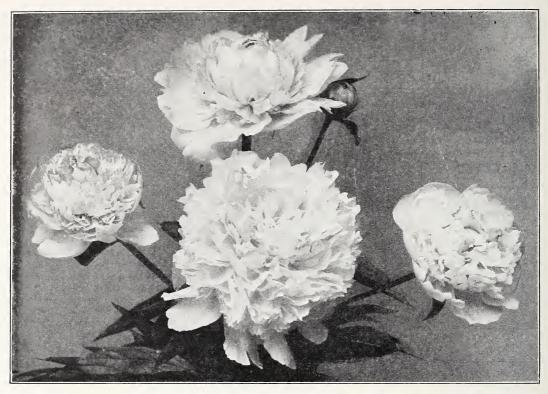

The varieties we offer are arranged in two classes, double and single, in each of which the names are arranged alphabetically, and where known, the name and date of the introducer immediately follows in parentheses. As color comes first in the choice of Peonies, we have placed the color on the same line as the name. Size and type naturally appeal next, and so follow the color. Having found these satisfactory in any variety described, one naturally next looks for the character and habit of the plant. To further aid purchasers we have made an alphabetical list of colors. See page 5. In addition, we shall be pleased to give by letter further information to intending purchasers.

DOUBLE PEONIES

SINGLE PEONIES—SEE PAGE 13

		2-4 eye		2	2
8.5 (56)	Adolph Rousseau. (Dessert and Mechin, 1890). Glossy, purplish garnet; one of the darkest. Very large; semi-double; very tall. Early	Div. 1	-yr.	2-yr.	3-yr.
·	midseason		2.00	3.00	
8.7 (62)	Albatre. (Crousse, 1885). Milk-white center, petals tinged lilac. Large, rose type; pleasant fragrance; medium height. Midseason. Strong, vigorous grower		1.25	1.75	2.25
8.6 (58)	Albert Crousse. (Crousse, 1863). Very fresh salmon-pink, delicate color. Large, compact, bomb-shape; fragrant; erect. Late		1.25	2.00	
7.4 (19)	Alfred de Musset. (Crousse, 1885). Milk-white, blush center, crimson flecks. Large, compact; medium height. Late		1.00	1.50	2.00
8.8 (41)	Alsace-Lorraine (Lemoine, 1906). Creamy white with a golden tint. Very large, flat flower, opening like a water lily. Strong grower; free bloomer. Late	3.50	4.50	6.50	
8.1 (59)	Asa Gray. (Crousse, 1886). Pale lilac sprinkled with dots of deeper lilac. Large, rose shape; very fragrant; medium height and habit. Midseason		1.50	2.25	
7.8 (49)	August'n d'Hour. (Calot, 1867). Dark, br'lliant rose-red. Medium to large, bomb-shape; showy bloom; medium height. Midseason. (Similar in color to Felix Crousse)		1.00	1.50	
8.0 (38)	Aurore. (Dessert, 1904). Pale lilac-white, lighter collar, slightly flecked with crimson. Large, flat, loose; medium height; compact bush. Late		1.50	2.25	
8.7 (56)	Avalanche. (Crousse, 1886): Creamy-white, slightly flecked with carmine. Large, compact, crown type; fragrant; strong growth. Nothing better. Often sold under name of Albatre. Midseason		1.25	2.00	
9.0 (79)	Baroness Schroeder. (Kelway). Flesh, fading to milk-white. Large globular, rose type; very fragrant; strong, free bloomer. Midseason		1.50	2.25	
8.0 (36)	Boule de Neige. (Calot, 1867). Milk-white, flecked with crimson. Very large, regular and compact; tall, erect growth. Very early midseason. (Similar to, but earlier than Mons. Dupont.)		.75	1.25	1.75
6.9 (19)	Canari. (Guerin, 1861). Guards amber-white, tinted pink; center clear yellow, fragrance X. Late		.60	.85	1.25
7.8 (22)	Carnea Elegans. (Calot, 1860). Soft flesh color flecked with crimson. Large, flat, compact, rose type; fragrant; medium height, late. Professor Saunders well says: "Indoors they preserve an enchanting combination of flesh color and pale yellow."		1.00	1.50	
8.7 (61)	Claire Dubois. (Crousse, 1886). Even, clear, satiny pink, tipped white. Very large, globular, rose type; tall, erect, strong growth. Very late		1.30	2.00	
8.1 (67)	Couronne d'Or. (Calot, 1873). White with yellow tints arising from a few stamens showing amidst the petals. Center petals tipped with carmine. Large, rather full flower of superb form. Strong grower and very free bloomer. Good keeper. Late		.75	1.25	1.75
7.2	De Candolle (Crousse, 1880). Uniform bright lilac-purple. Very large,		.60	1.00	
(23) 7.1	full, rose type; medium height; strong erect grower. Late midseason Delachei. (Delache, 1856). Violet-crimson. Medium size; semi-rose type;		.75	1.25	1.70
(43) 6.9	strong, erect, vigorous growth. Midseason to late				
(23) 7.8	sometimes salmon. One of the best yellow sorts. Midseason Duc de Wellington. (Calot, 1859). Pure white guards, sulphur center.		.75	1.25	
(46) 8.1	Large, bomb shape; very fragrant; tall, erect growth. Midseason		.50	.75	1.00
(66)	yellow, cup-shaped at first; it develops into a large bloomic grauually fading to white; fragrant; strong grower and free bloomer. Extra good commercial variety. Follows two to three days later than Festiva		.65	1.00	1.50
7.6 (66)	Edulis Superba. (Lemon, 1824). Dark pink, even color; large, loose, crown when fully open. Very fragrant; upright growth, early bloomer. On the confusion over this		.65	1.00	
8.7	variety, being sold under twenty or more different flames		.00	1.00	
(36)	type. Strong grower, free bloomer. Large, fragrant and beautiful	5.00	6.50		
8.3 (29)	Eugene Bigot. (Dessert, 1894). Brilliant red, medium size, compact, glob- ular, semi-rose type. Midseason		2.50	1	

In comparing prices with those of other growers, please note that we offer strong one, two and threeyear plants, except in the case of a few high-priced varieties where we also offer divisions.

Gloire de Charles Gombault-Beautiful at all Stages.

		2-4 eye Div.		2-yr.	3-vr.
7.3 (8)	Eugene Reignoux. (Dessert). Very br'lliant carmine-pink, shaded purple. Very large; cup-shaped. Early midseason		-	1.50	
8.3 (60)	Eugene Verdier. (Calot, 1864). Light pink with lilac-white collar. Large, rose, type; extra strong-growing plant; erect, rather dwarf. Fragrant. Late. Be sure you get the real thing; it is one of the best	1.50	2.50		
8.6 (58)	Eugenie Verdier. (Calot, 1864). (Also called Pottsi Alba). Pale pink, center deeper, flecked crimson. Large flat, rose type, rather loose; fragrant; tall, free. Midseason		1.25	1.75	2.50
8.4 (75)	Felix Crousse. (Crousse, 1881). Very brilliant red. Medium to large, globular, typical bomb shape; fragrant; strong growth. Midseason		1.00	1.40	
8.0 (31)	Festiva. (Donkalaer, 1838). Pure paper white with crimson markings in center. Large, full; very fragrant; dwarf. Late		.50	.75	1.00
9.3 (84)	Festiva Maxima. (Miellez, 1851). Paper-white with crimson markings in center. Very large and full, rose type; very tall, strong growth. The best early white peony; very fragrant		.65	1.10	1.50
9.1 (31)	France: Willard. (Brand, 1907). Blush white with occasional carmine blotch and changing to pure white. Large perfectly formed flower of semi-rose type. Strong grower; free bloomer, on strong, erect stems; guite fragrant. Late midseason	6.00	7.50		
8.1 (21)	Galathee. (Lemoine, 1900). Flesh white. Large, full rose type. Strong grower; very fragrant and very late	5.00	6.00		
7.1 (18)	General Bertrand. (Guerin, 1845). Dark pink, silvery center. Large anemone shaped bloom, with broad collar; fragrance XX; tall, strong, upright growth. Early		.50	.75	1.00
8.5 (46)	Germa'ne Bigot. (Dessert, 1992). Flesh p'nk, salmon t'nts; center flecked crimson. Very large, flat, strong and erect growth; free bloomer. Midseason		1.75	2.50	
7.9 (45)	Gloire de Charles Gombault. (Gombault, 1866). Outer petals fleshy-pink, collar clear salmon-flesh, shaded with apricot; center petals flesh-pink, striped with carmine. Flowers very showy, on tall stems in great profusion; crown type. Late midseason		1.00	1.50	
7.0 (11)	Gloire de Chencnceaux. (Mechin, 1880). Rose-red, silver tipped with age. Medium to large, globular rose type; fragrant. Upright grower. Late m'dseason		.50	.75	1.00
7.8 (19)	Gloire de Touraine. (Dessert, 1908). Brilliant, velvety, dark carmine rose. Rose type; erect; vigorous, fragrant. Late		2.00	3.00	
7.3 (41)	Golden Harvest. (Rosenfield, 1900). Pale pink to peach blossom pink, white crown. Rather dwarf type, but vigorous and free bloomer in clusters; fragrant. Midseason		.75	1.25	

		2-4 eye	0	
8.8 (62)	Grandiflora. (Richardson, 1863). Beautiful flesh-pink, with lighter shades at the center. One of the very largest pinks known. «Vigorous. Very late	Div. 1-yr.	2-yr. 2.00	3-yr.
8.1 (40)	Grandiflora nivea plena. (Lemon, 1824). Guard petals pure white, center slightly tinged sulphur and pink, and flecked with crimson. Very large rose type; vigorous; fragrant. Very early	1.00	1.50	2.00
7.4 (11)	Henry Murger. (Crousse, 1895). Uniform pure, mauve. Very large, globular, rose type; strong, erect growth. Late	.50	.75	
8.7 (49)	James Kelway. (Kelway). Rosy white changing to milk white. Very large, semi-rose type; fragrant; tall, strong. Early midseason	2.00	3.00	
7.9 (47)	Jeanne d'Arc. (Calot, 1858). Soft pink guard; collar sulphur to cream white and bright pink tufted center, tipped carmine. Medium to large, crown shape; fragrant; strong grower, free bloomer. Early midseason. One of the choicest of older varieties. Peach-blossom pink and cream, reminds one of peaches and cream	.75	1.25	
8.9 (38)	Jubilee. (Pleas, 1908). Color flesh white, fading to pure white. Petals narrow, loosely arranged, giving a feathery effect. Long stems.			
8.8 (57)	Strong grower. Free bloomer. Fragrant. Midseason	7.00 10.00		
9.8 (33)	excellent keeper. Early midseason	2.75	4.00	
9.1 (49)	sidered one of Kelway's best. Late midseason	28.00 35.00 5.00 7.50		
7.6 (5)	Lady Curzon. (Kelway). White guard with cream center. Award of merit at Royal Horticultural Society: Strong grower; fragrant. Early midseason	2.00	3.00	
9.0 (42)	La France. (Lemoine, 1901). Soft pink outer guards, splashed crimson. Very large, compact flower of rose type. Strong grower, free bloomer, very fragrant. Very late. (Not for sale).			
8.3	Lamartine. (Calot, 1860). (Also called Gigantea). Pale lilac-rose, darker center. Very large, loose, irregular, rose shape; tall, free bloomer; very fragrant. Early midseason	1.25	1.75	
8.3 (37)	La Rosiere. (Crousse, 1888). Pure white, shading to cream in center, due to presence of yellow stamens. Large, flat, semi-double; medium height. Name is well chosen, for it is more like a rose than any other Peony. Midseason	1.25	1.75	
8.1 (35)	La Tendresse. (Crousse, 1896). Cream color, changing to pure white, slightly splashed carmine; rose type; very large, compact, flat; fragrant. Strong, upright growth. Early midseason	1.00	1.50	2.50
7.5 (57)	La Tulipe. (Calot, 1872). (Syn. Multicolor Calot, '73). Lilac-white, outer petals striped with crimson. Large, flat, rose type; fragrant; very tall, strong growth. Midseason	.50	.75	
8.8 (22)	Laura Dessert. (Dessert, 1913). Guards, cream white; center bright canary yellow. Large, full flower; rose type; superb. Early. Like other yellow peonies. it should be opened in the house to retain its rich	15.00 20.00		
9.9 (56)	yellow. Le Cygne. (Lemoine, 1907). Milk white flower. Petals incurved. Perfectly formed, enormous, globular flower. Very fragrant. Early. Civen the highest score of all peonies by 56 votes	13.50 20.00		
8.1 (58)	Livingstone. (Crousse, 1879). Soft rose pink, silver tipped, some carmine spots. Large, compact, rose type; tall, vigorous, free bloomer. Very			
9.0 (33)	Longfellow. (Brand, 1907). Bright crimson with cherry tone; perhaps the most brilliant of red peonies. Erect habit, vivid color, long season, rare value. Originator says, "It is the most brilliant peony in our	1.25	1.75	2.50
, ,	whole list." Midseason	6.75 9.75		
7.6 (10)	Lord Kitchener. (Renault, 1915). Brilliant cherry red. Rose type. Free- bloomer and strong grower. Late	2.75		
8.6 (39)	Mme. Auguste Dessert. (Dessert, 1899). Glossy flesh, slightly tinged carmine; center flecked crimson. Very large, imbricated, cup-shaped flower, rose type; erect; medium height. Early midseason	2.00	2.75	
7.4 (14)	Mme. Bollet. (Calot, 1867). Pale lilac-pink, silvery reflex. Large, very compact, rose type; upright growth. Late midseason	.75	1.00	
7.8 (31)	Mme. Boulanger. (Crousse, 1886). Glossy soft pink, tinged lilac, silvery flesh border; large, compact, rose type; upright; very fragrant. Late midseason.	1.50	2.25	
7.3 (42)	Mme. Bucquet. (Dessert, 1888). Uniform velvety-crimson, with garnet tints. Large, loose, rose type; fragrant, strong, upright growth. Midseason.	.75	1.25	
8.1 (49)	Mme. Calot. (Miellez, 1856). Flesh white, tinged canter shaded slightly darker with a sulphur tint; very large, full, globular bloom; fragrant; early and abundant bloomer. On well established plants the flowers are exquisite.	.75	1.25	
6.8	Mme. Chaumy. (Calot, 1864). Pale lilac-rose center slightly darker. Medium	.50	.75	1.00
(21) 7.9 (36)	Mme. Crousse. (Calot, 1866). Pure white with faint crimson markings. Large, globular, crown type; fragrant; medium height. Late midseason.	.60	1.00	1.50

			2-4 eye		_	_
7.5 (40)	Mme.	de Galhau. (Crousse, 1883). Delicate pink with a rose-white collar. Very large, compact, rose shape; very fragrant; strong growth. Very	Div.	ı-yr.	2-yr.	3-yr.
7.7 (13)	Mme.	late. d'Hour. (Calot, 1864). Light pink, silver tipped, darker center. Large, compact, rose type; tall, erect, superb. Late midseason		1.00		2.00
8.2 (31)		De Treyeran. (Dessert, 1899). Delicate flesh white, dotted with carmine. Large, flat, compact flower; tall; free bloomer; early	3.00	4.00		
7.7 (30)	Mme.	de Vatry. (Guerin, 1863). Milk-white, lilac-white collar, center splashed with crimson. Very large, full, crown-shape; medium height; strong grower. Midseason		.75	1.00	1.50
7.9 (60)	Mme.	de Verneville. (Crousse, 1885). Pure white, center tipped with carmine. Very large, full bomb shape; fragrant; medium height; strong growth. Early		.60	1.00	1.50
7.9 (46)	Mme.	Ducel. (Mechin, 1880). Bright silvery pink. Very large, well built flower; bomb type; strong grower; free bloomer; odor pleasant; medium height; one of the best. Early midseason		.75	1.25	
8.5 (65)		Emile Galle. (Crousse, 1881). Very soft pink, changing to milk-white in center. Very large, compact, flat, rose type; tall, fragrant. Late.		1.00	1.50	
8.9 (50)		Emile Lemoine. (Lemoine, 1899). Glossy white, tinged pale pink and covered with tiny dots of deeper shade. Large, globular, rose type; a strong grower, good bloomer. One of the best. Midseason		1.50	2.25	3.25
9.4 (47)		Jules Dessert. (Dessert, 1909). Clear pink, tinged flesh and straw yellow, undulated central petals, flecked with carmine and intermixed with a few visible golden stamens. Very large, imbricated flower of fine shape; one of the most beautiful in color and form. When the flower opens under cloudy weather, or in the house, the exquisite tints are really marvelous. Only four peon'es rank higher than this. Late midseason.	5 .00	7.50		
7.9 (45)		Geissler. (Crousse, 1880). Rose pink shading to white or silvery flesh; compact, rose type. The largest in our collection. Fragrant. Late midseason.		1.25	1.75	2.25
7.4 (16)		Lemoine. (Calot, 1864). Clear violet-rose, slightly tinged carmine. Large, full, globular bloom. Late midseason		1.00	1.50	
		Lemonier. (Calot, 1860). Exquisite pale rose-pink. Very large globular bloom, rose type; strong grower and very free bloomer. "The size of this peony. its great height, robust habit and fine color, make it a most striking garden subject." Midseason. Much superior to Mme. Lemonier. 1865		2.00	3.00	
8.1 (23)		Leonie Calot. (Calot, 1861). Very delicate shell-pink, center darker. Medium size, very compact, globular. Late midseason. Its only fault a rather weak stem		.75	1.25	2.00
7.4 (9)	Mlle.	Marie Calot. (Calot, 1872). Milk-white tinged flesh, flecked crimson. Large, rose type; very fragrant; strong grower. Late midseason		1.00	1.50	2.00

		2-4 eye		2	2
6.5 (8)	Mlle. Renee Dessert. (Mechim, 1880). Fine lilac, silver-tipped. Large, globular, bomb type; toll, erect. Midseason	Div.	.60	2-yr.	1.50
8.1 (33)	Mlle. Rousseau. (Crousse, 1886). Milk-white, splashed carmine. Large globular, rose type; extra strong stem; medium height. Late midseason.		1.25	1.75	2.25
8.2 (30)	Marcelle Dessert. (Dessert, 1899). Milk-white, slightly splashed with lilac; high crowned, flecked crimson. Fragrance of a tea rose. Midseason Marechal McMahon. Identical with Aug. d'Hour, which see.	2.25	3.00		
8.4 (56)	Marguerite Gerard. most white. midseason (Crousse, 1892). Very pale salmon-pink, fading to al- Large, compact, rose type; very strong growth. Late		1.00	1.50	2.00
8.1 (13)	Marie. (Calot, 1868). Blush-white fading to milk-white. Large size, compact, rose type; fragrant; very tall, on strong stem. Very late		1.00	1.50	2.00
8.9 (50)	Marie Crousse. (Crousse, 1892). Soft salmon-pink. Large, full flower; bomb type; borne on stiff stems; very fragrant; tall, strong. Midseason.	2.25	3.00	4.50	
7.9 (7)	Marie d'Hour. (Calot, 1883). Pale pink, darker center, flecked carmine. Large, rose type; rather dwarf, erect. Midseason		.60	1.00	1.50
8.3 (46)	Marie Jacquin. (Verdier). (Syn. Water Lily). Rose-white, fading to white, Large, globular, semi-double; upright, very strong growth; cup-shaped like a water lily. Midseason		1.00	1.50	
8.5 (67)	Marie Lemoine. (Calot, 1869). Pure white with cream-white center. Large, very compact, rose type; pleasing fragrance; medium height; extra strong stems. Very late		1.00	1.50	
9.1 (36)	Martha Bulloch. (Brand, 1907). Soft rose pink. Enormous cup-shaped flower. One of the best peonies in existence and exquisitely beautiful. Strong grower. Free bloomer. Fragrant. Late	16.50	24.00		
9.0 (63)	Milton Hill. (Richardson). Soft, clear, flesh color, deepening toward the center. "There is in this flower a quality of color that is beyond the power of words to describe." Very large globular, compact, rose type; fragrant. Very late		2.50	3.50	
7.8 (47)	Modeste Guerin. (Guerin, 1845). Very attractive, bright pink, tinged carmine, solid color; large bloom, typical bomb type; fragrance XX. Fine upright habit, very vigorous, early and free. We consider this the best carmine-pink peony. Often called The American Beauty Peony. With it we won the first prize for fifty blooms, deep pink, at the Peony Show		1.00	1 75	
7.3 (13)	of the American Peony Society. Mons. Barral. (Calot, 1866). Solid pink, tinged lilac. Full rose type; strong		.75	1.75	2.00
7.1 (16)	grower. Late. Mons. Bastien LePage. (Crousse, 1885). Uniform pure mauve, silvery reflex. Very large, crown shape; incurved petals; tall, extra strong stems. Midseason		1.00	1.50	
7.1 (22)	Mons. Boucharlat Aine. (Calot, 1868). Light pink with silvery reflex. Very large, full, compact, rose type; very strong, vigorous growth. Midseason.		.65	1.00	1.50
8.3 (57)	Mons. Dupont. (Calot, 1872). Milk-white, center splashed with crimson. Large cup-shaped, semi-rose type; fragrant; tall, erect. Late midseason.		.90	1.40	
9.2 (78)	Mons. Jules Elie. (Crousse, 1883). Pale lilac-rose, silvery reflex. Very large, compact, globular; very fragrant; tall, vigorous growth. Early		1.50	2.25	
8.8 (62)	Mons. Martin Cahuzac. (Dessert, 1899). Very dark garnet with black reflex, petals so glossy as to appear varnished. Medium to large, globular, semi-rose type. Medium height; strong, vigorous grower. Early midseason.	2.75	4.00	6.00	
8.4 (42)	Mont Blanc. (Lemoine, 1899). Milk-white, center slightly tinted rose. Very large, compact, globular rose type; fragrant and free bloomer. Midseason.	3.00	5.00		
	Number One—Unnamed, imported variety; exquisite shell pink flower of large size and beautiful form; center splashed with crimson after the manner of Festiva Maxima. Rose type; very late. It excels in attractiveness many of the highest pr:ced peonies. A royal variety; only one strong

Those wishing to plant perennial gardens should take up the matter at once, have the ground prepared so that the plants may be set early in September. If perennials are set late in the fall or in spring, they give very little bloom the first year. Set early in the fall, they become thoroughly established and give a good account of themselves the following summer.

We are always glad to assist our customers in making a selection of Peonies, Phlox, Iris, etc. Please state fully the results desired, size of plot to be planted, etc.

Below are two collections, carefully made, regardless of price, to cover all colors, early (E), midseason (M), and late (L) bloom, of varieties anyone might be happy to own. If desired however, substitutes may be made by the purchaser. Please note low prices for one-year plants, all of which will bloom next year. Two-year plants in column two.

Types of Peonies

Single. Those with a single row of wide guards, and a center of yellow pollen-bearing stamens.

Semi-Double. Those with several rows of wide petals, and a center of stamens and partially transformed petaloids.

La Fiancee, Superb Single Peony Blooms early, but side buds keep it in bloom until late

Japanese. These have wide guards the same as the Singles, but with the stamens and anthers greatly enlarged into narrow, thick, petaloids of various colors, tipped with vestiges of the yellow anthers without pollen.

Anemone. A step farther in the process of doubling with the stamens all transformed into short, narrow petals, forming a round cushion in the center of the flower.

Crown. In this type wide petals are developed in the center of the flower, forming a high crown, with the narrow, short petals forming a ring or collar around it. Often crown and guards are of one color, and the collar another, or lighter shade.

Bomb. The next step in which all the center petals are uniformly wide, approaching the guards, but distinctly differentiated from them, forming a globe-shaped center without collar or crown.

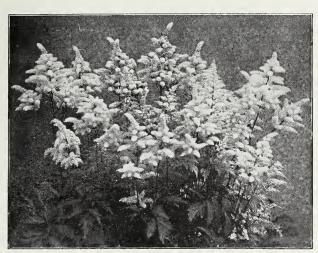

Semi-Rose. Flowers in which the petals are all uniformly wide, but are loosely built, with a few pollen-bearing stamens visible, or nearly concealed.

Rose. The process of doubling is completed, all stamens fully transformed into evenly arranged wide petaloids, similar to the guards, forming a perfect rose-shaped bloom.

In her book on "The Peony", Mrs. Edward Harding says: "I know of no plant that is so satisfyingly beautiful in every stage of its development. When the blossoms appear it is indeed hard to leave the garden; no matter how many times a day one gazes at them, there is something newly entrancing on each successive glance"

Hardy Perennials

From the beginning the Rosedale Nurseries have made a leading specialty of Perennials. While we do not carry a large number of varieties, yet we grow a very select list of the best and hardiest. Heavy, 25 cts. each; \$2.00 per ten; \$16 per 100; except as noted: Five of a kind at ten rate; 25 or more at the 100 rate. In some varieties, Extra Heavy Clumps \$3.00 per ten; also very large clumps at 50 cents each. Numbers indicate approximate height in feet. Time of bloom is indicated by initial letters of the months.

Queen of May. A lovely soft rose-lilac, almost pink; beautiful. 32 inches. 25 cts.

Speciosa. S dark lavender, shaded lighter; F lavender, shaded bright purple. 42 inches. 25 cts.

Phlox

Following the lris and Peonies in time of bloom, but in no way behind them in popularity, are the Hardy Perennial Phloxes. We have weeded out all the magentas and purples and believe that our list is as select as that offered by any firm.

Blooming size, 25 cts. each; \$2.00 per ten; \$18.00 per 100, except as noted. Large clumps, XX, 35 cts. each; \$3.00 per ten. Five at ten rate, fifty at hundred rate, provided not less than five of a kind are

Bridesmaid. White, with large crimson center.

Dawn. Light delicate pink, darker center; free bloomer, medium height.

iffel Tower. Large flowers; chaste, pure salmon with purple eye; tall grower. Eiffel Tower.

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark red eye; one of the handsomest. 30 cts.; \$2.50 per ten.

White with decided crimson-carmine eye; individual trusses and flowers very large; sturdy, erect habit. 30 cts.; \$2.50 per ten.

Independence. Large, pure white.

Lothair. Large; rosy salmon, with crimson eye.

Mme. Bezanson. Deep red.

Miss Lingard. Blooms in May, fully six weeks earlier than the other sorts, and continues in bloom three months; a grand white variety, which should be in every collection.

Mrs. Chas. Door. A beautiful shade of lavender.

Peachblow. Delicate pink, deep rose center; rather dwarf-habit, splendid trusses. Superb.

Queen. Pure white. One of the best. Tall.

Rynstrom. A grand new Phlox, resembling Pan-theon, but with larger flower heads; a soft clear pink, medium height and strong grower.

R. P. Struthers. Bright rosy-red; crimson eye.

Thor. A most beautiful and lovely shade of deep salmon-pink, suffused and overlaid with a scarlet glow. 30 cts.; \$2.50 per ten.

Von Lassburg. Purest white, individual flowers very large.

W. C. Egan. One of the finest Phloxes yet introduced and while the individual flowers according to the color chart are of a delicate lilac color, illuminated by a large bright solferino eye, the color effect as a whole is a delicate pleasing shade of soft pink. 35 cts., \$3.00 per ten.

New Phlox-Mrs. E. J. Norman

Creeping Phlox

Amoena Rosea. Beautiful plant and pretty pink flowers; very early. 5 inches.

bulata (Moss Pink). Rose pink; blooms in May; useful for trailing Subulata (Moss Pink). over rocks.

A Superb New Phlox

Mrs. E. J. Norman. A superb, new phlox, originating at Lenox, Mass., was offered for the first time by us in 1921. When visiting "Erskine Park", Lenox, we were fascinated by the beauty of this new phlox, of which we procured the stock. After a trial of two years at Rosedale, we can most highly recommend it to our customers. Color is a delicate blush pink. The plant is a strong grower, and free bloomer, with petals of great substance. Price 40c each, \$3.50 per 10.

Reduced Prices of Roses for Fall 1922

We are glad to be able to offer our usual list of varieties of Hybrid Perpetuals, Hybrid Teas, and climbing roses at considerably reduced prices and assure our customers as fine stock as we have ever offered. In case customers prefer spring shipment, we will book the order at fall prices, provided a deposit of one-quarter the amount of the order is made this fall. These roses, grown on the Japanese Multiflora, now considered by rosarians the best stock, are sure to give abundant bloom with very little trouble. Late November shipment for all, except Hybrid Teas, for which we advise early spring north of New York.

No order under \$5.00 for Fall Delivery, and three or more plants of each variety must be ordered to secure the ten rate.

We Do Not Substitute Unless Requested

A combination of rates may be applied in one order. Varieties offered at 60c, \$5.00 per 10, \$45.00 per 100. Varieties offered at 75c, \$6.50 per 10, \$60 per 100. Varieties offered at 85c, \$7.50 per 10, \$70.00 per 100.

Varieties offered at \$1.00, \$9.00 per ten.

Orders for 50 or more plants, not less than 3 of a name, 100 rate.

Orders for 6 to 50 plants, not less than 3 of a name, 10 rate.

Less than 3 of a name will be sold at single rate.

Fall Planting

You can depend upon us to hold for spring such of your order as would not be safely planted in your locality in autumn. Plant in the autumn because:

- 1. The roots of Fruit and many other hardy Deciduous Trees and Shrubs either form callouses or make rootlets preparatory for spring growth. If planted in spring (especially late) the leaf growth make a greater demand for food than the roots are ready to supply. Consequently, either failure or small growth results. Thus a half year may be gained by Fall planting.
- 2. Perennials planted early in autumn become thoroughly established for early spring growth and practically a year is gained. But they must be planted early; September 1 to 15 is best. Like the Peony, some should never be planted in the Spring, and the earlier in the fall after September 1, the better.
- 3. Time for planting in autumn at Tarrytown covers a period of four (4) months, August to November inclusive; starting with Evergreens and ending with Deciduous Trees and Shrubs; while spring-

time is scant two (2) months-April and part of

May.

4. Soil and Weather Conditions are usually more suitable in fall. Often a cold wet April not only hinders planting but the soil is not in that pliable condition it should be for pleasant and successful

operations.

5. Help is always in greater demand in spring because of renewal in all kinds of business. Thus it may be difficult to set out plants promptly on arrival. Owing to longer season in autumn, prompt planting is not so necessary as the trees may be heeled in, awaiting convenience of the planter.

The help problem has become one of the most important reasons for Fall Planting.

6. Many of the rapid growing, hardy evergreens make their usual growth in the spring, following August or September planting; whereas in late spring planting, the growth is short because the roots have not yet become established.

Coniferous Trees

No planting is complete without evergreens. They are beautiful always. Come to see our LARGE SIZES FOR IMMEDIATE EFFECT. SPECIMENS UP TO 25 FEET IN HEIGHT, in Several Varieties (See Illustration): Pines, Retinisporas, Hemlocks and Spruces, all of which may be safely moved.

Nearly 77 varieties are prosperous at ROSEDALE. Their beauty and charm are yours at:

Pseudotsuga—Douglas Fir

Colorado Variety

"THE DOUGLAS SPRUCE OR FIR is the tree for the million. It would be difficult to over-rate its beauty." Its horizontal branches, with pendulous branchlets richly clothed with bright green foliage, render it a striking object in the landscape. Those we planted at Lenox. Mass., in 1908, 1,000 feet above sea level in the Berkshires, have stood that trying climate as well as the hardiest varieties known and the foliage appears as bright and fresh in spring as in autumn. E. H. Wilson says of it: "Either as a lawn tree, for avenues or for massing, the Douglas Fir is equally valuable and it needs no commendation." "THE DOUGLAS SPRUCE OR FIR is the tree for

In comparing prices please note the fact that we make no charge for burlapping the ball of evergreens, or for boxing or packing sizes up to and including 4 feet.

Juniperus-Juniper

All the Junipers are valuable ornamental plants—the upright species as single specimens or in groups, and the low forms well adapted for rocky slopes or banks. Junipers thrive best in a sandy, loamy soil, moderately moist, but do well in rocky and gravelly soils in sunny open situations. Excellent for seaside planting.

J. Oblonga Pendula. (Weeping feet high. Native of the mo	ountains of	
Japan; perfectly hardy; very	graceful.	
Specimens	\$25.00	to \$30.00

Pinus-Pine

The Pines are essentially inhabitants of the poor, sandy soils and dry situations. Their stout root-system enables them to seek scanty water supplies where other species find it difficult. They thrive in any good soil not too wet.

Pinus Austriaca. (Austrian, or Black Pine). One of the best Pines for forming screens and shelter for more tender trees. Is perfectly hardy and thrives in any moderately dry soil. Flourishes near the seacoast and on high, bleak hills, or in cities where smoke and dust would prohibit the use of other evergreens.

Three reasons why Rosedale Evergreens have become famous, viz.:

1st—They are oft transplanted to develop a mass of fibrous roots and a compact growth. 2nd—Our soil is such that the burlapped ball will reach you in solid form.

3rd—Our expert system of packing.

Taxus-Yew

The Yews are very desirable evergreens, densely clothed with dark green foliage. They thrive best in a moderately moist, sandy loam, and endure shade well.

- T. B. Washingtonii. One of the richest of the Yews in form and color. Specimens, 4 to 6 ft. broad.....\$15.00 to \$20.00

Tsuga-Hemlock

Tsuga Canadensis. (American Hemlock). One of the most beautiful native trees; being especially rapid in growth and absolutely hardy, together with the fact that it transplants easily, make it a very useful evergreen. Its fine feathery foliage and graceful habit make it a great favorite. The best evergreen for hedge-planting. It bears the shears well and may be kept at any size and shape. If allowed full sunlight, it will hold its lower branches and remain symmetrically furnished from the ground, thus making a splend'd lawn specimen.

Broad-Leaved Evergreens

\$ 3.00

O class of plants when well grown gives more satisfaction than the broad-leaved Evergreens. They are beautiful at all seasons of the year. Not only does this class include the most gorgeous flowering plants but the foliage of some, in winter, even exceeds its summer beauty especially in the Leucothoe, whose leaves take on the finest shades from well supplied this year with both large and small sizes of Leucothoe, and Mountain Laurel. All of these plants are native to America.

plants are native to America.

ndromeda Floribunda, (Syn. Pieris Floribunda). A dwarf plant with myrtle-like foliage, bearing in early spring in great profusion, pure white flowers resembling Lily of the Valley. Andromeda Floribunda.

Choice Fruits

MANY TREES OF BEARING SIZE

No charge for boxing or packing. 100 and 1,000 rates on application.

We offer a well tested list of Fruits. In addition to the two-year-old trees usually sold, we offer in most varieties four and five year trees transplanted.

Please note that the stone fruits are omitted from this list as they are not safely planted in autumn. We have an extra nice lot of transplanted plums, cherries, peaches, etc. Place your order now and have them reserved for you.

With well developed roots, these extra size trees will soon come into bearing. In fact, some of them are bearing fruit in the nursery this year.

Apples

Each	10
Standard. First-class, 5 to 7 ft\$.75	\$ 7.00
First-class, 5 to 10 ft., trans- planted\$1.00 to 2.50	
Dwarf—	
3 to 4 ft\$1.50 4 to 8 ft. trans\$2.00 to \$4.50	\$14.00

Summer

Early Harvest. Yellow. July and Aug. Golden Sweet. Large, yellow. Aug. and Sept. Red Astrachan. Crimson, streaked yellow. July and Aug.

Sweet Bough. Pale yellow. August.

Yellow Transparent. Skin pale yellow, sub-acid. Aug.

Autumn

Bismarck. Red and yellow; hardy, very early. Fall Pippin. Yellow, fine baking. Dec. Fameuse. (Snow Apple). Deep crimson; flesh snowy white; dessert. Nov. to Jan. Gravenstein. Red and yellow. Sept. and Oct. Oldenburg, Duchess of. Red and yellow; bears young. Aug. and Sept. Wealthy. Dark red and yellow; flesh white, sub-acid. Oct.

Winter

Baldwin. Bright red; very productive. Delicious. Brilliant dark red; sweet, juicy. R. I. Greening. Constant bearer; best cooking. Grimes' Golden. Rich golden yellow. Jan. to Apr. Hendrick Sweet. Red. Nov. to Apr. McIntosh. Dark red. Flesh white. Nov. to Feb. Newtown Pippin. One of the best. Nov. to June. Northern Spy. Yellow striped red. Until June. N. W. Greening. Flesh yellow, fine grained, firm. Rambo. Yellow and red. Oct. to Jan. Rome Beauty. Yellow and bright red. Dec. to Mar. Spitzenburg. (Esopus). Deep red; flesh yellow. Stayman Winesap. Dark red; sub-acid. Sutton Beauty. Waxen yellow. Jan. to Feb. Talman's Sweet. Whitish- yellow, tinged red. Iwenty Ounce. Striped, cooking. Oct. to Sept. Winter Banana. Pale yellow, tint red.

Dwarf Apples

Our stock of Dwarf Apples is quite complete. Some of the trees bore this year a dozen or more apples each in the nursery row.

Duchess of Oldenburg. Fameuse. Gravenstein. Greening.

Northern Spy.
Red Astrachan.
Wealthy.
Yellow Transparent.

Crab Apples

Hyslop. Beautiful in flowers; crimson. Transcendent. Red and yellow. Sept.

Pears

z cars	
Standard, 5 to 7 ft	13.50
Dwarf, 3 to 4 ft	7.50
*Indicates both dwarf and standard.	

Summer

*Bartlett. One of the best known Pears. Early September. Clapp's Favorite. Resembles Bartlett, ripening a

few days earlier.

Tyson. Good size, juicy and sweet. August.

Autumn

Bosc (Beurre Bosc). Large, russety Pear. Oct.
*Duchess d'Angouleme. Attains perfection as a dwarf. Very large. lowell. Yellow, sweet. October. Kieffer. Golden-yellow; bears young. *Kieffer. Nov.

*Seckel. Strong grower and good bearer.
*Worden Seckel. Large fruit. Oct. to Dec.
Sheldon. Large round, russet and red; very juicy,
melting and vinous. Oct.

Winter

Anjou. Large, handsome, buttery; an excellent bearer; keeps until Christmas. *Anjou.

Lawrence. Golden-yellow, medium size, and abundant bearer. Nov. to Jan. Winter Nelis. Medium. Medium size, dull russet; rich fine flavor, good bearer. Nov. to Jan.

Hardy Grapes

Qua

Currants-Continued Quinces Fay's Prolific. Probably the best red currant. Less acid than the Cherry, excellent flavor, very productive. Each 10 \$11.50 Perfection. (New). Red, rich, mild sub-acid. *Orange. Large, round, golden yellow. Oct. White Grape. The best white currant. *Rea's Mammoth. Large fine variety of the Orange Quince; vigorous and productive. *Champion. Large, oval, bears very young. Rhubarb Rhubarb \$1.25 XXX 2.00 Currants Plant 3 feet apart each way. Fertilize well late in the fall, spading in the fertilizer in the spring. Currants-Two year. Fay's Prolific and White Grape......\$2.00 Perfection Myatt's Linnaeus. Large, early, tender.

Deciduous Trees

The deciduous trees of this list, being perfectly hardy, may be planted in many sections of the northern United States. We have omitted from this list many choice trees on which there is some question of fall planting, such as beeches, birches, tulip trees, etc. Those desiring other trees from those found in our list, will find in the spring catalog quite a complete list including large trees for immediate effect. In orders placed this fall, we will be pleased to reserve such of the trees as will be more safely planted in the spring. If we find your order includes any trees on which there is a question of safety of fall planting, we will hold them until spring.

A CROSS ROAD IN ROSEDALE NURSERIES

ROSEDALE SPECIALTIES

Although Leading Specialties at Rosedale are Evergreens and Peonies, of which there are thousands upon thousands of fine specimens, nevertheless a full supply of Deciduous Shrubs and Trees, both fruit and ornamental, render Rosedale Nurseries one of the most complete in the Empire State.

OUR STOCK OF LARGE SIZES OF ALL THESE IS UNEXCELLED

These may be moved with safety, as trequent transplanting has developed a mass of feeding roots close to the trunk.

We are glad to announce reduced prices in many sizes for Fall delivery.

Rosedale Trees rank high with experts, and are recommended by the most noted landscape architects of New York and Boston. One order alone, Spring 1921, from a well known firm, amounted to \$7,700. This order came our way because, from a previous order of nearly \$8,000, only three trees failed. This is a remarkable record since these were mostly very large trees.

Our location on the Saw Mill River road, one and one-quarter miles north of the County Alms House at East View, is within short trucking distance to all points in Westchester County.
